

**About the job:**

If you're eager to learn and aren't afraid to dive straight into creating the way buildings will be designed, built, and operated in the future, come and join us!

We're looking for a versatile Solution Delivery Specialist to join our team in Islamabad. Someone who can quickly take ownership across a variety of roles, from project delivery to support the design of our product and processes.

**Your role:**

Your main responsibility as a Solution Delivery Specialist will be to ensure that we onboard new projects, manage their delivery, and deliver value to our customers from day one. It'll be your job to create the connection between our customer's project plans, the construction site, and our product. You'll be working in our Operations team, as well as closely with our customers, product, and computer vision teams on some of the most prestigious projects in the UK, US and GCC markets.

**Our culture:**

We're very proud of our people and the close-knit family culture we've built across London, Sarajevo and Islamabad offices. Despite the distances, we're united through the passion with which we approach our goals and the fun that we have along the way. The following should give you a good idea of what type of culture you'd be joining:

- We encourage proactivity and taking full ownership of problems and initiatives: we let you pave your own path and give you the space to continuously learn and grow even if it means taking a few detours.
- We support each other: if a process breaks or if you're struggling, you can always count on the people around you and the people far away from you, to help you get back on track.
- We run on feedback: direct and transparent praise and constructive criticism, communicated with the best of intentions. There is no other way to learn!
- Ideas and approaches are always judged on merit rather than source: we welcome discussions and challenges. This way everyone makes a tremendous impact no matter the role.

**Requirements:**

You should apply if:

- You want to shape a non - traditional role
- You want your skills and contributions to lead your growth
- You are adaptable, passionate and have a strong work ethic
- You have a Bachelor's or Master's degree in Mechanical Engineering/Civil Engineering/Architecture
- You have a good understanding of reading 2D construction drawings and navigating through 3D models.
- You have a strong proficiency in English
- 1-3 years of experience

**Benefits:**

- Competitive salary
- Extra vacation days
- Unique growth opportunities
- Positive and supportive working environment
- Open and transparent culture
- Opportunity to transform your career path through being part of an exciting series B startup journey

NOTE: This role is available in Islamabad (Pakistan).
